

I drive semi truck and rely on xm instant traqffic and weather to make an informed decision geting around cities to avoid back-ups and accidents.If local trafic on standard radio would do there job things would go beter but there idea of traffic reporting is a total joke.I mean this for every city I have travelled through.You get 2 seconds of info along with local gossip and then 10-15 minutes of commercials.by the time you get any real updates it is too late and you are stuck in traffic.Let us continue to pay for a despertly needed service that is timely with continuous updates and none of the usual bull we get on standard am and fm.I mean if I really wanted to get a recipe or find out how everyones weekend went,while trying to get weather or traffic info I could just watch the Today show in the morning and find out as much information that I can ever get on local programming. Please let XM do there job and I hope they add many more cities.Sincerely,Keith A Justice
